Note: This report consists of a 5-year demographic study for Summer terms. The demographic data pages present actual UHCL certified data extracted from a PeopleSoft query for inclusion of each student's most current Academic Plan record. Student level data use a CBM-001 extract, and SCH information is derived from the CBM-004 course report. If variance exists when comparing these figures to other previously published reports, it is important to note that these data may follow a different methodology. Totals by college and classification have all been verified with actual certified THECB reports for accuracy.

Note:

1 Residency represents the county, state, or foreign country in which the student is a resident as identified by the student as his/her permanent address at the time of application to the institution.

This variable should not be used to identify how students are actually charged tuition as other factors are involved in that determination.

2 Tuition status indicates the status of the student for tuition purposes. Beginning Summer 2006 new measures were implemented to provide a greater level of accuracy for this variable.

However, this variable is not a reliable indicator for how tuition may have actually been charged to students.
