Assessment Cycle

Use assessment results to make data-driven decisions and improvements to plan

Develop and update outcomes based on assessment results and use of results

Modify and Improve

Develop Outcomes

Design Assessment Plan

Interpret and Analyze Information

Implement Plan and Collect Information

Interpret findings, summarize analysis of results, and indicate action (planned or taken) in use of results

Design, modify, and improve methods, strategies, and criteria for success

Conduct strategies, engage in assessment activities, and collect results
