

HOW TO RUN THE PO STATUS REPORT

The PO Status report displays detailed Purchase Order information (i.e. PO status, Finalize PO status, corresponding requisition information, encumbrance balances, etc.) and may be generated for all PO's, including non-budget checked PO's and closed PO's.

This report also displays transactions associated with a particular PO. The associated PO voucher does not have to be posted in order to be included on the report, but it must have passed budget checking. Any vouchers with a budget checking status other than Valid (i.e. due to document tolerance errors or budget errors) will not be displayed on the report.
