

Software Engineering

ONLINE - TOP 10 IN THE NATION

[BestColleges.com](#) has ranked UHCL's [Software Engineering M.S. Online](#) at No. 4 in the nation for several consecutive years. The degree program currently stands at No. 7, putting it consistently in the Top 10 in the nation. Our faculty is highly experienced in all areas of business and industry. They offer UHCL students leading-edge knowledge in their areas of expertise. UHCL's Software Engineering program has been at the forefront of delivery of both online and web-based classes for the past 10 years. Whether students are in the classroom or distance learners, UHCL faculty is connected, caring, and dedicated to their success.

EARN THE M.S DEGREE IN 15 MONTHS OF STUDY

Full time Software Engineering M.S. students may complete the Online M.S. degree in 15 months of study by completing four eight-week classes in each of two semesters, plus two more classes in the last semester. Courses in the program include Agile Software Development, Software Project Management, Requirements Engineering, Reuse and Reengineering, Software Architecture, Software Testing, Engineering Software I, Engineering Software II, Data Science and Software Engineering Life Cycle. Classes are offered online with the support of a web-based class management system that houses all class materials and provides access to the instructor and other students.

AFFORDABILITY AND CREDIBILITY

UHCL's College of Science and Engineering provides an affordable solution to those seeking an online option for acquiring an M.S. in Software Engineering. According to the U.S. Bureau of Labor Statistics, the annual median salary for a software engineer is approximately \$101,000, and the job outlook increase for 2018-2024 is 17%.
