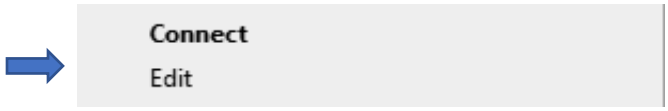
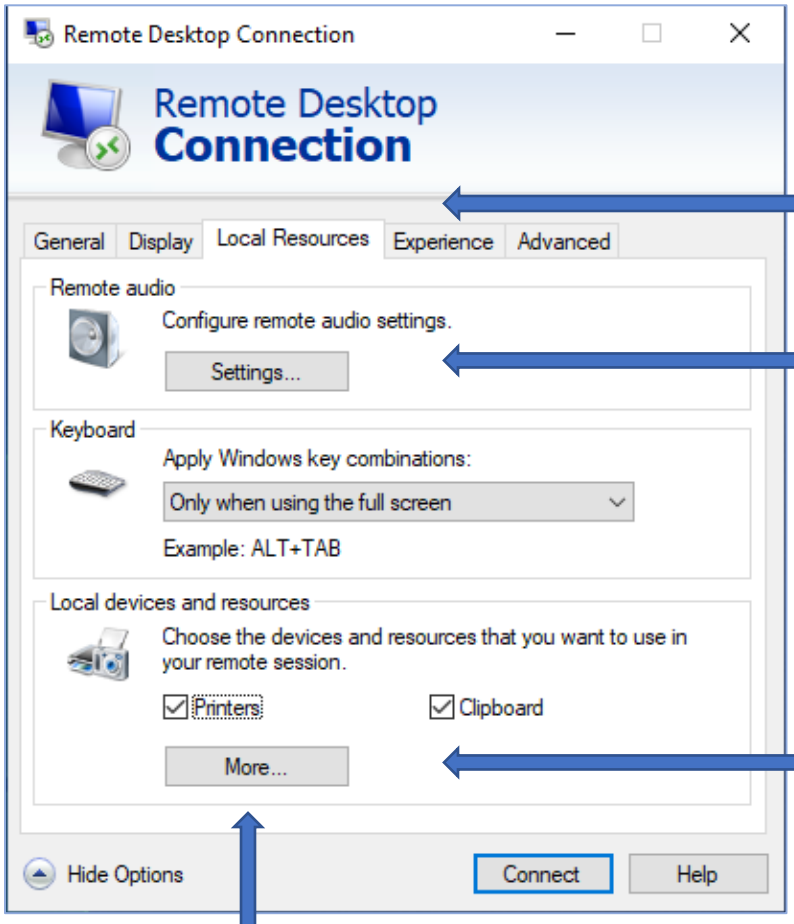
SHARING LOCAL DEVICES USING REMOTE DESKTOP CONNECTION (RDP)

Right click on the Remote Desktop file downloaded and **select "Edit"**

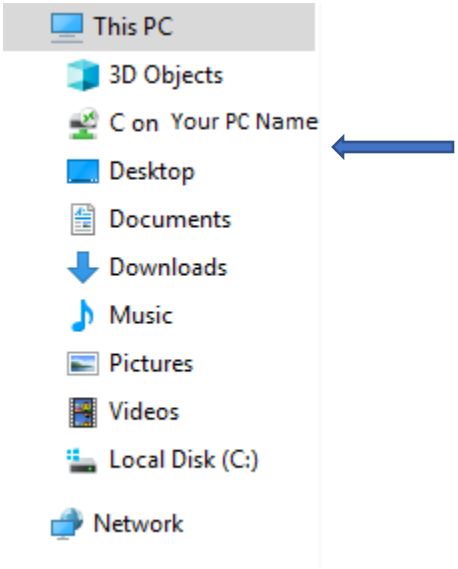




Select the tab for the device you want to access. Under display you can enable both your monitors if applicable.

Under the "More" tab you can **select "Drives"** or expand it and select which specific drives you want accessible on the remote computer.

The drive will accessible under "This PC" when saving or opening a file. You can also find it by opening "File Explorer.



(Optionally under "More" you can enable your video capture devices.)
