

HOW TO CONNECT TO UHCLPRIVATE ON ANDROID DEVICES

- Wi-Fi Network Name (SSID): **UHCLPrivate**
- Authentication is required;
 1. Select **Settings**.
 2. Select **Wireless & Networks**.
 3. Select the network **UHCLPrivate**
 4. Set the following options; EAP method:
PEAP
Phase 2 Authentication:
MSCHAPV2
CA certificate: *(unspecified)*
User certificate: *(unspecified)*

5. Enter the correct domain, your userid and your password.

For all UHCL faculty and staff the domain is **UHCL**.

For all students, the domain is **PCLAB**.

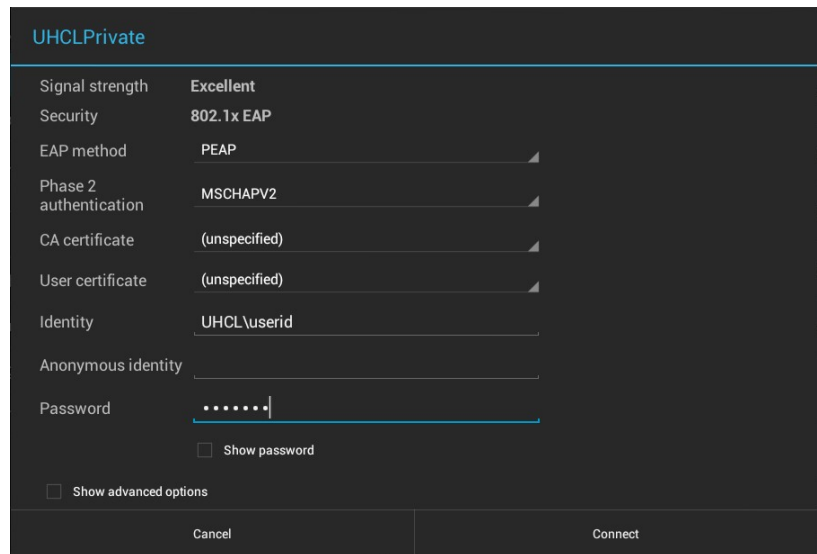

Examples:

UHCL\Employee

PCLAB\Student

6. Select **Connect**. Your device should connect to the network.

- Your use of this network is subject to our **Acceptable Use Policy**.

All images are from a stock installation of Android 4.0 (Ice Cream Sandwich). If you're using an older version of Android or a customized interface, your device may have different screens. Some versions of Android (2.2 or lower) may require an app to expose all the required settings for Wi-Fi authentication.

Still need help?

For additional assistance with connecting to the UHCL Public Wi-Fi, please bring your Android powered device to the UCT Support Center in the Bayou Building, room 2300 or call 281-283-2828.
