# Principal as Instructional Leader Certification Assessment Test Prep Session

The [Principal as Instructional Leader Certification Assessment Test Prep](#) is designed to provide students in approved Texas Preparation Programs an opportunity to prime their test-taking skills for the 268 assessment. The new ONLINE session will allow principal preparation candidates to practice each of the 268 question types and build test-taking skills from home!

Students will receive general test-taking tips and strategies, engage in a deep-dive in the domains and competencies, review and practice with 268 question types and content, and conduct a TAPR review. In addition, they will be guided on how to approach the Constructed Response items and will write a CR timed response during the session. They will be taught how to self-assess the quality of their writing and each participant will receive personal feedback on the CR practice item following the training.

Students will also answer cluster questions and receive rationale for correct responses. We will close the online session with a Q&A about the 268 exam. You won't want to miss out!
