

FLAT OUT WONDERFUL

Imagine a place close by where families, hikers, photographers, bicyclists, and nature lovers can enjoy an amazing mixture of natural wonders. A place where shallow wetlands sustain huge flocks of birds, where cypress-lined bayous shelter abundant wildlife, and fields of native grasses and wildflowers sway in the gentle Gulf breeze. The Katy Prairie is just such a place and the Katy Prairie Conservancy is working hard to keep it that way for you and all Texans forever. But we need you!

5 REASONS TO SAVE THE KATY PRAIRIE

ONE

It's a great place to enjoy the outdoors. You can enjoy a tour, hike, bike, or walk wherever the country roads may lead you. Once there, you might just get to see something amazing: perhaps a Bald Eagle, Eastern Meadowlark, bobcat or a Red-eared Slider turtle, or maybe just enjoy a beautiful sunrise or sunset.

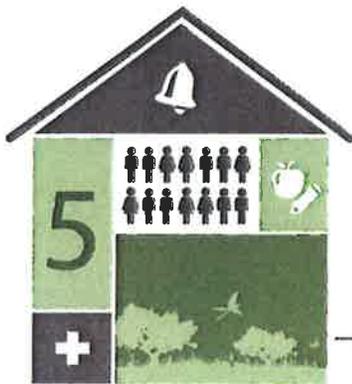

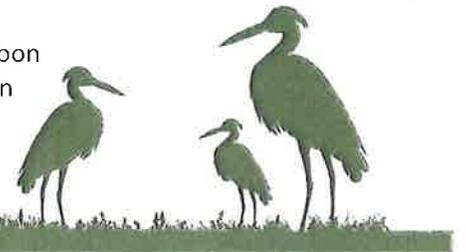

TWO

It's our heritage, save it for the future. You can be part of an effort to make sure that we keep our wetlands and prairies healthy and that we set aside preserve land and parkland.

THREE

It's good for the air we breathe and the water we drink. You can help the prairie grasses and wetlands recharge our underground aquifers and sequester carbon from the air. By helping the prairie remain as grasslands, you can help reduce downstream flooding as grasses love to absorb water.

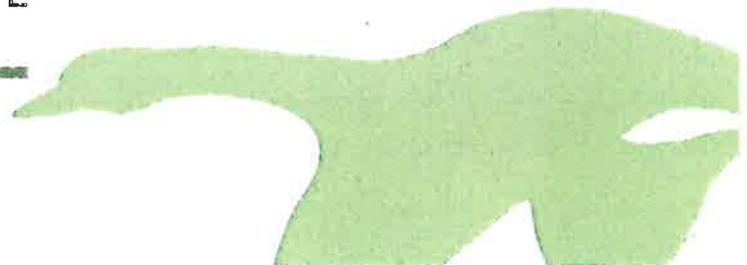

FOUR

It's an exciting natural laboratory for students and teachers seeking to improve science, math, writing, and history knowledge and skills. Professional scientists can also use the prairie to make groundbreaking discoveries about ecology, alternative fuels, and agricultural production.

It's a local food source. You can help keep local farmlands so that you have food grown close to you. Farmers can continue to grow rice and vegetables and ranchers can graze cattle for sale to local markets.
