POSITION SUMMARY

The Technology Support Specialist 2 provides basic to intermediate support, instruction and troubleshooting support to faculty, staff, students, and university affiliates via a variety of contact methods which includes but is not limited to: one-on-one meetings, telephone, web interaction, and chat. Primarily, the support involves supporting the software on the University Supported Software List, support of university servers from a user perspective, resolving home computing issues as they pertain to user interaction with university information technology assets, and point-of-use support of classroom technology. In addition to the Supported Software List, the position may need to support special software required by university departments or by authorized university special events. The position will also provide informational statuses to end-users on a variety of university information technology or business related processes. The Technology Support Specialist 2 assists with developing and delivering end-user training, maintaining informational websites, and developing end-user documentation. The position will assist with the production of periodic reports and assessment data and therefore must have a thorough knowledge of the report writing software in order to create/design reports on demand. The position assists with the follow-up of user calls to assure user satisfaction with the call conclusion. Technology Support Specialist 2 will mentor tier-one Support Specialist and lower level Technology Support Specialist to ensure best response to customer requests. The day and/or night shift positions will be responsible for opening/closing procedures/responsibilities included but not limited to voice mail, email, and front counter support. Hours will flex day and night shifts with rotating Saturday shift. Classroom specific: This position supports the University's Technology Enhanced Classrooms and Support Center activities related to common

troubleshooting, wireless PC setup, maintenance, and classroom support. The position requires the working knowledge for handling day to day support of equipment and services provided by the Support Center. This position is also responsible for the "pushing" of images to remote computers, installing, maintaining, troubleshooting software, and maintaining software and hardware inventories deployed in the classrooms. Equipment to include but not limited to control systems, video conferencing systems, computers, projectors, laptops, and various types of video players.

Duties and responsibilities	% Time
Provide advance user support with computing, media and/or networking issues (problem resolution, additional support consultation resources data entry). Provide in-depth technical support to users (at point-of-use, over phone, and/or in person), opens and tracks repairs and work orders for computing, media, networking systems, and/or products and services. Works scheduled and non-scheduled time at front counter including but not limited to start of semester, staff shortages, determination by supervisor, and when mentoring specialist.	50
Maintaining knowledge bases, Website, training material, and technical handouts. Performs other job-related duties as assigned.	20
Provide and develop courses for End User Training to faculty, staff and/or students one-on-one or in a formal classroom environment.	15
Maintain Support Center databases, report processing, generating reports, and inventory control of Support Center and classroom resources.	15
