Disparity Across Colleges at our Institution

I think here we don't need to comment on all 25 because we have seen this slide before- just comment on the 4 that we are covering

Leadership division, which is tackled at today's presentation, is one of the benchmarks with the most pronounced dispersion. On the other hand, Faculty leadership shows the smallest disparity across all benchmarks and themes. There is pretty much consensus among faculty from all colleges on that theme.

Areas of Strength vs Areas of Improvement

Strengths	Need to Improve
Pace of decision making & stated priorities of President: + <u>URM</u> , FOC and full	Pre-ten: Important group since they need to be well-informed because of their status
Overall: URM, FOC and full professors seem ok in this area for both President & Provost	White faculty, and in some areas tenured faculty, are not as satisfied
Men, Full, URM: ok with Provost	Can improve communication & stated priorities

OK = ~3.0

Interesting observation: URM, FOC, & Full trend slightly positive, but White & Pre-Ten trend slightly negative

Strengths	Need to Improve
COB strongest response. CSE and COE trend positive.	<u>HSH</u> : ratio = 1.82. The comments and our HSH colleagues might provide some clarity on this
Asian and Men: OK	Pace of decision making, stated priorities, communication, & faculty input

Interesting observation: This one needs to be looked at per College since responses are vastly different

Question: What are the demographics of our chairs and directors? Why such opposite responses from men and women, and assoc vs full? The means and frequencies might provide more information
