

### Internship Opportunity

Apache Industrial Services is very interested in coaching those that share the same passion of the Health and Safety of personnel. We believe it is of prime importance to all operations of the company. My team and I would like to interview 5 candidates. If you or Dr. Akladios have students that you highly recommend, I would like to reach out to them. My contact information is listed below, resumes may be sent to my email.

Carissa Bosquez at [CBosquez@Apacheip.com](mailto:CBosquez@Apacheip.com)

Responsibilities of an environmental health and safety intern include working with team members to assist in day-to-day activities of the department, assisting in preparation of reports and training programs, assist with industrial hygiene assessments (air monitoring and noise surveys), and maintaining personal protective equipment.

I have copied our company site below. We have a variety of services, including a craft training facility. This will give you and the students a chance to review what Apache Industrial Services offers.
