

The Center for Alaska Coastal Studies, based out of Homer, Alaska, has seasonal positions open for naturalists, environmental educators, and day camp leaders in the spring and summer of 2018. See below for more information, check out our website, or e-mail if you have questions.

<https://www.akcoastalstudies.org/about-us/jobs-volunteers.html>

As an Environmental Educator, Naturalist or Intern with the Center for Alaskan Coastal Studies, you'll have the opportunity to share your energy and enthusiasm by leading educational programs for children, school groups, and visitors to Alaska. Seasonal staff are employed at the Wynn Nature Center (a 140-acre boreal forest preserve), the semi-remote Peterson Bay Field Station and the Yurt on the Homer Spit.

As an Environmental Educator during the spring season (March 28th–May 26th), instill wonder, scientific understanding and love for coastal ecosystems with school groups from throughout Alaska. Lead overnight field trips and day trips in the forest, marsh and intertidal zones.

As a Naturalist, Intern or Environmental Educator during the summer season (May 28th to September 3rd) impart knowledge and a sense of stewardship with visitors and groups from around the world. Lead multi-day field studies and guided natural history tours, develop programs for all ages and/or participate in citizen monitoring projects. Duties vary depending on the specific position.

Benefits include compensation of \$1,500–\$2080 per month DOE, and housing. Qualified applicants are energetic and flexible, have a background in environmental education and forest and/or marine ecology, and the maturity to live in group situations.

To apply, email a cover letter, resume, and contact information for 3 professional references to jobs@akcoastalstudies.org by January 19, 2018. Please indicate desired position."
