

Halliburton Manufacturing, Industry Recruiting

Halliburton Energy Services, Inc. is looking to hire an entry-level environmental professional for our Conroe, TX drill bits manufacturing plant in December. This associate environmental professional will become intimately involved in the day-to-day environmental management of the site including:

- Management of environmental compliance, regulatory requirements, and environmental permits
- Internal and external reporting of environmental metrics, regulatory reports, and projects
- Providing sustainability guidance in the areas of waste reduction and energy conservation to employee teams
- Interacting with site leadership, HSE global management, and shop-floor personnel to express the significance of environmental requirements

The role will report to the Health, Safety, and Environmental (HSE) Supervisor at the Conroe DBS manufacturing plant and will have indirect reporting to the Manufacturing and Technology Environmental Manager. We are ideally looking for a May 2017 or December 2017 environmental science graduate; prior internships or environmental-focused work or research during college is a plus.

This manufacturing plant is situated in Conroe, TX, just north of The Woodlands. It employs approximately 400 people and is Halliburton's sole drill bits manufacturing facility. The site is one of 14 plants within Halliburton's Manufacturing division and supports our field service activities by providing quality equipment tailored to the unique needs of each well and each customer.

Founded in 1919, Halliburton is one of the world's largest providers of products and services to the energy industry. With approximately 50,000 employees, representing 140 nationalities in approximately 70 countries, the company helps its customers maximize value throughout the lifecycle of the reservoir – from locating hydrocarbons and managing geological data, to drilling and formation evaluation, well construction and completion, and optimizing production throughout the life of the asset.
