

## **HSE Coordinator: International Plaza Dr., Houston, TX**

Halliburton Energy Services, Inc. – Supply Chain Manufacturing

The HSE Coordinator will support our Technology organization by implementing management systems at Halliburton's International Plaza research and development facility. These laboratories develop cutting edge tools, equipment and chemicals for our field locations in over 80 countries, and are the driving force that makes Halliburton an innovative leader in oil field technology. As an HSE leader in our Technology group, the HSE Coordinator will have the opportunity to integrate safety and environmental safeguards into these products as they are developed and see the global impact of their work.

Under joint supervision of operations and HSE leadership, the HSE Coordinator is responsible for the implementation of health, safety and environmental policies, procedures and guidelines. The responsibilities for this role include, but are not limited to:

- hazard identification and risk management
- incident reporting, investigation and causal analysis
- waste minimization, pollution prevention and control
- emergency response
- internal, regulatory, and customer audits and inspections
- training and process improvement
- additional compliance activities in all areas of HSE

Requirements include an undergraduate degree in a STEM (science, technology, engineering, math) or HSE-related field and three years of experience in Oil & Gas, Research & Development or Manufacturing.
