

## **Industrial Safety Engineer/Specialist (summer intern)**

**Perform technical work associated with two projects during the summer as described below:**

***Project 1: Development and Implementation of Lockout/Tag Out procedures for approximately 250 machines in two facilities.***

- Develop lockout/tag out procedures for approximately 250 machines in two facilities
- Develop an annual authorized employee training and machine-specific audit binder for each operational department (and one master binder for the EHS department).
- Populate with the new procedures and training documents.
- Train authorized employees on each new machine-specific lockout/tag out procedure.
- Document all training

***Proposed Project 2: Dakota Software***

- Go through each module of the Dakota Software system and document the regulations that apply to the Houston and Cypress facilities.

**The minimum qualifications for this position as follows:**

- Must have at least 67% completion of an Industrial Safety-related BS degree or 50% of an Industrial Safety-related MS degree
- Good computer skills - including Solidworks, Excel, and Word.
- Excellent mechanical aptitude and problem solving skills.
- Professional documentation and communication skills.
- Must be willing and able to work both indoors and outdoors.
- Must be a US person.
