

SUPPLY CHAIN EXCELLENCE & RESILIENCE SERIES

SPONSORED BY THE TEXAS MANUFACTURING ASSISTANCE CENTER (TMAC)
GULF COAST REGION AT UNIVERSITY OF HOUSTON-CLEAR LAKE (UHCL)

About the Program

The Supply Chain Excellence & Resilience Series offers hands-on webinars and workshops that focus on enhancing supply chain strategies. Participants will gain insights into improving supply chain resilience, enhancing sourcing strategies, and optimizing operational efficiency. As part of this series, participants will gain access to the Texas Manufacturing Network (TMN), a national platform connecting manufacturers and suppliers with potential customers. By joining TMN, your business can expand visibility across Texas and the U.S. and gain access to powerful Supplier Relationship Management (SRM) tools.

Instructors

- Dr. Ipek Bozkurt, Ph.D., CPEM
- Dr. Gene Shan, Ph.D.
- Faculty of Engineering Management at UHCL

Webinar: Overview & Upcoming Workshops

Online

January 22, 2025, 10:00 AM - 11:00 AM

Workshop 1: Building a Resilient Supply Chain

UHCL Pearland
1200 Pearland Parkway, Pearland, TX 77581

February 7, 2025, 9:00 AM - 01:00 PM

Workshop 2: Enhancing Sourcing Strategies & Cost Efficiency

UHCL Pearland
1200 Pearland Parkway, Pearland, TX 77581

February 14, 2025, 9:00 AM - 01:00 PM

Benefits of Attending:

- Receive a customized Supply Chain Assessment to align strategy and execution
- Engage in interactive, team-driven simulations to enhance real-time decision-making
- Gain practical tools for risk management and resilience in the supply chain
- Master a structured approach to evaluating sourcing decisions and optimizing costs
- Earn a Certificate of Completion (8 hours) for attending both workshops

Program Details:

WEBINAR: Overview & Upcoming Workshops

- Learn about impactful success stories, upcoming workshops, and how TMN provides companies with valuable tools to enhance visibility and discover new customers

WORKSHOP 1: Building a Resilient Supply Chain

- **Supply Chain Foundations & Assessment:** Understand supply chain dynamics, key performance drivers, and assess your current maturity to identify strengths and growth areas
- **Risk Management:** Learn to anticipate, assess, and mitigate risks to keep your supply chain resilient and adaptable
- **Beer Game Simulation:** Engage in a collaborative, team-based game to experience supply chain decision-making and the impact of strategic choices

** Pizza lunch will be provided for workshop participants*

Note: All workshop participants should bring their laptops to fully engage in interactive activities and simulations that will be conducted through a web browser

WORKSHOP 2: Enhancing Sourcing Strategies & Cost Efficiency

- **Sustainment Platform:** Recruit suppliers and work efficiently with Sustainment platform
- **System Optimization:** Apply Theory of Constraints to boost overall supply chain efficiency
- **Interactive Simulation - Dice Game:** Practice operational strategies in a dynamic, hands-on game
- **Total Cost of Ownership (TCO):** Use the TCO model to evaluate sourcing decisions for better strategic cost management

** Pizza lunch will be provided for workshop participants*

Note: All workshop participants should bring their laptops to fully engage in interactive activities and simulations that will be conducted through a web browser
